He added that he had spoken to the Planning Officer and as yet no reports had been received from the Highways Department or the Flood Officer.* **After debate a vote was taken and a majority decision. Object- Overdevelopment of the site – the proposed position would create an out of line situation and would change the character and appearance of the current street scene and overlook the current properties. Photographs of the current site and access were shown to Councillors.* **Object Overdevelopment of a limited site. Designated flood plain area (suggested siting of one of the properties is on the edge of river bank) and the natural gradient of the land will create risk to properties on Phernyssick Road and surrounding areas. The narrow single track access (Originally designated as a turning space for Pentillie Gardens) is totally unsuitable for an increased volume of traffic and has a history of issues since previous application PA18/04118. It is noted that the previous application for this site was addressed as adjacent to Pentillie Gardens not as land N of Phernyssick Road. Councillors questioned the argument of need when an application PA19/09225 Kernow Vean for up to 82 dwellings has been recently approved and is less than 1 mile away. After discussions on the new design between the Planning Officer and the applicant’s architect it was agreed to adhere to the Parish Council’s recommendations that more granite be used in the East/South elevations and the area where cladding was proposed maybe rendering with granite coins would be more appropriate and be more in keeping with the original building that was demolished.
